

PRESS RELEASE

Arecont Vision and DVTel announce Latitude® support for Arecont Vision MegaVideo® IP Cameras

Altadena, CA – March 19, 2007 –Arecont Vision 5M, 3M, 2M, 1.3 Megapixel and dual-sensor 3.0/1.3 Megapixel IP cameras are now supported by DVTel, market leader in the development and delivery of intelligent solutions over IP networks.

Arecont Vision and DVTel announce that Arecont Vision megapixel IP cameras, including the unique AV3130 dual-sensor DayNight™ camera, are supported by DVTel Latitude Network Video Management System (NVMS). This support enables users worldwide to utilize Arecont Vision cameras with the DVTel's award-winning intelligent security solutions.

"Arecont Vision is pleased to announce this integration with the open-platform award-winning IP surveillance system from DVTel. This integration represents a very cost-efficient enterprise-level megapixel solution that offers a superb value to our worldwide customers," said Steven Sarfati, Senior VP of Sales at Arecont Vision.

"DVTel's customers are requiring megapixel camera solutions to work with our open video and access control platform, and Arecont fit the bill in both product performance and price.," said Ed Thompson, CTO of DVTel "DVTel's business is one of creating solutions that operate on standard IT centric hardware meaning servers, storage, and switches, while implementing DVTel's mission to support multiple vendors edge devices from our software solutions."

About DVTel

DVTel is leading the transition from closed, proprietary security systems to open, standards-based platforms. We are the solution of choice worldwide for mission critical and enterprise level installations because of our unified physical security operating platform. Our systems are found in thousands of installations around the globe.

DVTel's software and hardware components are unified into the intelligent Security Operations Center (iSOC) V5 platform, which enables the end user to operate, monitor and administer all video, audio, access control, visitor management, credential creation, analytics and alarm monitoring assets—anytime, anywhere. The iSOC V5 is the first unified services platform that offers a complete rules-based, distributed architecture. With the most innovative products and world class service giving you the freedom to run your business...that's a complete solution and The Complete Picture.

About Arecont Vision

Arecont Vision is the leading manufacturer of high-performance HDTV IP cameras and associated software. Arecont Vision products are made in the USA and feature proprietary low-cost massively parallel image processing architectures MegaVideo® and SurroundVideo® that represent a drastic departure from traditional analog and network camera designs. These innovative technologies enable Arecont Vision to deliver multi-megapixel digital video at analog camera price points.

Arecont Vision product line includes the 5M, 3M, 2M and 1.3 Megapixel models as well as unique high-performance multi-sensor cameras that drastically reduce the user cost per unit area under surveillance. These 8 Megapixel quad-sensor 180° and 360° panoramic cameras, AV8360 and AV8180, feature proprietary SurroundVideo® technology and deliver 24 times the resolution of the best analog surveillance cameras. In addition, AV3130, the world's fastest dual-sensor DayNight™ network camera, offers crystal clear imagery down to starlight conditions of 0.01 lux.
