**Arecont Vision Expands Integration With Milestone Systems
To Provide H.264 Megapixel Cameras And Protect Interoperability.**

Glendale, CA (September 14, 2008) – Arecont Vision, the industry leader in megapixel IP camera technology, has expanded integration with Milestone Systems to provide operability of the company's recently introduced H.264 IP megapixel cameras and Milestone's popular IP video surveillance software solutions.

"Milestone's IP video surveillance solutions are widely recognized for their high degree of functionality and operational versatility," said Dr. Michael Kaplinsky, CEO, Arecont Vision. "We are pleased to be working with one of the pioneers in IP video surveillance control and management software solutions to further facilitate integration of Arecont Vision's innovative H.264 megapixel cameras."

Arecont Vision's suite of megapixel imaging solutions is led by the company's recently introduced line of H.264 IP cameras with 1.3M, 2M, 3M and 5 megapixels. The line features Arecont Vision's fully compliant implementation of H.264 compression technology to provide security professionals with multi-streaming capabilities at different video formats, frame rates, and resolutions. Arecont Vision's H.264 encoder delivers 80 billion operations per second resulting in a 10X bandwidth and storage reduction on average over MJPEG megapixel equivalents. Additionally, Arecont Vision's multi-megapixel cameras offer High Definition resolution that is up to 25X greater than standard resolution IP or analog cameras.

"H.264 compression will have a significant impact in taking surveillance systems to the next levels of performance, so Arecont's H.264 megapixel cameras will be an important component of future solutions, which Milestone is supporting in our XProtect™ IP video software platform." States Henrik Friberg, VP Strategic Alliances and Co-Founder of Milestone Systems.

About Milestone

Milestone Systems is a global developer of open platform IP video management software. XProtect™ gives users a powerful surveillance solution that is easy to manage, reliable and proven in more than 35,000 customer installations. With support for the industry's widest choice in network hardware and integration with other systems, XProtect provides best-of-breed solutions to "video enable" organizations - reducing costs, optimizing processes, protecting people and assets. Milestone software is sold through authorized partners in 90+ countries.

About Arecont Vision

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras and associated software. Arecont Vision products are made in the USA and feature proprietary low-cost massively parallel image processing architectures MegaVideo® and SurroundVideo® that represent a drastic departure from traditional analog and network camera designs. These innovative technologies enable Arecont Vision to deliver multi-megapixel digital video at standard IP VGA camera price points.
