**Arecont Vision Adds NICE Systems
To Growing List Of Technology Partners.**

Anaheim, CA (September 21, 2009) – Arecont Vision, the industry leader in IP-based megapixel camera technology, continues to expand enrollment in its Technology Partner Program. Announced today at ASIS, Arecont Vision and NICE Systems are working together to ensure seamless integration of megapixel imaging devices into their IP video management platforms.

“Using Arecont Vision H.264 cameras, we have been able to achieve lower CPU load on both the server and the client side,” said Erez Goldstein, NICE Systems Product Marketing Manager. “Arecont Vision cameras work great on our platform and offer users and integrators the benefit of more detailed images and improved TCO.”

NICE Systems is the leading provider of Insight from Interactions solutions and value-added services, powered by advanced analytics of unstructured multimedia content – from telephony, web, radio and video communications. NICE’s solutions address the needs of the enterprise and security markets, enabling organizations to operate in an insightful and proactive manner, and take immediate action to improve business and operational performance and ensure safety and security. NICE has over 24,000 customers in more than 150 countries, including more than 85 of the Fortune 100 companies. More information is available at <http://www.nice.com/>.

“Arecont Vision’s alliance with NICE Systems will result in higher performance and efficiency for IP video systems employing megapixel cameras,” said Raul Calderon, Vice President of Strategic Relations, Arecont Vision. “Our collective goal is to continue to provide a true service to the industry through optimization of innovative surveillance, storage and transmission solutions.”

Arecont Vision offers the security industry's broadest lineup of surveillance cameras ranging in image resolution from 1.3 to 10 megapixels, including models providing advanced capabilities such as dual day/night and panoramic viewing.

About Arecont Vision

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras and associated software. Arecont Vision products are made in the USA and feature low-cost massively parallel image processing architectures MegaVideo® and SurroundVideo® that represent a drastic departure from traditional analog and network camera designs. These innovative technologies enable Arecont Vision to deliver multi-megapixel digital video at IP VGA camera price points.
