Arecont Vision Announces Integration With OnSSI.

Anaheim, CA (September 21, 2009) – Arecont Vision, the industry leader in IP-based megapixel camera technology, today announces the introduction of On-Net Surveillance Systems, Inc. (OnSSI) as one of the newest members of their Technology Partner Program. The announcement, made today at ASIS 2009, will allow for the integration of Arecont Vision's H.264 megapixel cameras into OnSSI's Ocularis IP Video Management platform.

"OnSSI's Ocularis IP Video Management platform provides customers with the flexibility to continually integrate a variety of technologies into their systems," said Mulli Diamant, Vice President of Sales, OnSSI. "Arecont Vision cameras are a great example of how we can incorporate the best technologies available."

On-Net Surveillance Systems, Inc. (OnSSI) offers a comprehensive IP video surveillance control and management software solution in its Ocularis platform, designed to operate with unprecedented levels of user-intuitiveness and scalability. Ocularis' open-architecture, non-proprietary solution platform supports Arecont Vision H.264 cameras to provide users with higher-resolution images without overtaxing the system either at the server level or the client level.

"We are pleased to be working closely with OnSSI to assure integration of Arecont Vision H.264 megapixel cameras with their leading IP video management and control platforms," said Raul Calderon, Vice President of Strategic Relations, Arecont Vision.

"Working with industry leaders like OnSSI paves the way for integrators and end-users to incorporate Arecont Vision megapixel cameras into their systems on a very sophisticated level."

Arecont Vision offers the security industry's broadest lineup of surveillance cameras ranging in image resolution from 1.3 to 10 megapixels, including models providing advanced capabilities such as dual day/night and panoramic viewing.

For more information contact Arecont Vision by calling toll free 1-877-CAMERA-8, or visiting www.arecontvision.com.

About Arecont Vision

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras and associated software. Arecont Vision products are made in the USA and feature low-cost massively parallel image processing architectures MegaVideo® and SurroundVideo® that represent a drastic departure from traditional analog and network camera designs. These innovative technologies enable Arecont Vision to deliver multi-megapixel digital video at IP VGA camera price points.
