**Arecont Vision Advances Its Partnership with NUUO to Facilitate H.264
Megapixel Camera and NUUO's Network Video Recording Integration.**

Glendale, CA (December 9, 2008) -- Arecont Vision, the industry leader in megapixel IP camera technology, furthers its alliance with Taiwan-based NUUO Inc. to enable seamless integration of Arecont Vision's innovative H.264 megapixel camera line with NUUO's IP+ network video recording (NVR) software.

"With the dramatic reductions in bandwidth and storage achieved by Arecont Vision's H.264 megapixel cameras, we have experienced a rapid adoption of the technology by the surveillance industry," said Nathan Wheeler, Arecont Vision's Sales Manager for the Western US and Canada. "Combining the system savings achieved with our H.264 megapixel IP camera line with the well established and cost efficient network video

recording solutions from NUUO will enable even more users to reap the rewards of High Definition Surveillance at substantial overall cost reductions. We are very pleased to further our partnership with NUUO as we team up yet again to bring the leading surveillance solutions to market.”

“At NUUO, we strive to expand the possibilities for users to achieve their surveillance mission using various platforms and interfaces,” said Amoson Hsu, Product Manager of NUUO Inc. “Arecont Vision's megapixel network cameras using H.264 compression fit that goal perfectly.”

Leading the Arecont Vision suite of megapixel imaging solutions are the company's recently introduced line of H.264 IP megapixel cameras with 1.3M, 2M, 3M and 5 megapixels. The cameras incorporate Arecont Vision's fully compliant implementation of H.264 compression technology to provide security professionals with multi-streaming capabilities at various video formats, frame rates, and resolutions. Arecont Vision's H.264 encoder delivers 80 billion operations per second, which results in a 10X on average bandwidth and storage reduction over MJPEG equivalents. Also, Arecont Vision's multi-megapixel cameras offer High Definition resolution that is up to 25X greater than standard resolution IP or analog cameras.

About NUUO

NUUO, Inc., Taipei, Taiwan, is well known in the field of security for its reliable performance and graphical user interface that provides three key functionalities – searching, warning and patrolling. NUUO's platform supports more than 471 models from 27 brands, and its software has been installed around the world in more than 30 countries.

About Arecont Vision

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras and associated software. Arecont Vision products are made in the USA and feature proprietary low-cost massively parallel image processing architectures MegaVideo® and SurroundVideo® that represent a drastic departure from traditional analog and network camera designs. These innovative technologies enable Arecont Vision to deliver multi-megapixel digital video at standard IP VGA camera price points.
