Arecont Vision Announced as Outstanding New Vendor by PSA.

Award Given at PSA Tec 2010 Show.

(l to r: Marcus Batten of PSA and Arecont Vision's VP of Sales & Marketing, Scott Schafer)

Glendale, CA (June 23, 2010) - Arecont Vision, the industry leader in IP-based megapixel camera technology proudly announces their acceptance of the PSA Outstanding New Vendor Award at this year's PSA Tech 2010 Show. This award was created to acknowledge PSA vendor partners who provide PSA with outstanding service and quality products. Winning vendors were selected based on achieving high scores on a survey completed by PSA

members and PSA customer service staff. Scoring was based on eight performance categories: technical support, price advantage, responsiveness, ship dates, return authorizations, local rep support, product quality and reliability and overall improvement.

"It has been a pleasure to work with Arecont Vision and their professional team; they provide a quality product with excellent service and are quick to respond to our inquiries and requests," said Marcus Batten, Director of Vendor Management at PSA Security Network.

PSA Security Network, based in Westminster, Colorado, includes members who specialize in the design, installation, integration and maintenance of access control, video surveillance, intrusion detection, and fire and life safety systems. PSA Security Network's members combine their purchasing power and the resources of vendors like Arecont Vision to provide customers with the benefits and personal attention to detail of regional companies.

"The Outstanding New Vendor Award that we received from PSA is important to the people of Arecont Vision for many reasons. First, PSA has a terrific group of members and we are honored that they chose Arecont Vision this year for this recognition. Second, the Arecont Vision employees and representatives have enjoyed working very hard with PSA and it is gratifying to see that the PSA members are excited about our products and recognize the hard work and support that our people provide to them every day," said Scott Schafer, Executive Vice President of Sales and Marketing. "We are looking forward to a long relationship with PSA and hope to grow our business substantially together."

Arecont Vision's cameras range in image resolution from 1.3 to 10 megapixels, including cameras providing advanced capabilities such as dual day/night and panoramic viewing. Using H.264 compression, Arecont Vision cameras provide greater compression efficiency to solve system issues related to bandwidth and storage. The Arecont Vision line also includes the MegaDome™ Series of all-in-one dome cameras and a new compact JPEG series of cameras to address cost-sensitive applications. Most recently, Arecont Vision has introduced their industry-leading 10 megapixel Dual-Mode camera as well as their new lineup of panoramic cameras.

About Arecont Vision

Arecont Vision is the leading manufacturer of high-performance megapixel IP cameras and associated software. Arecont Vision products are made in the USA and feature low-cost

massively parallel image processing architectures MegaVideo® and SurroundVideo® that represent a drastic departure from traditional analog and network camera designs. These innovative technologies enable Arecont Vision to deliver multi-megapixel digital video at IP VGA camera price points.
